Greetings!

If we had discovered a motif for this catalog, it might be about format. Whether that's globes, silk "escape" maps, folding pocket maps, puzzles or a map in a cane, there's an interesting world of cartography in these items that we don't always encounter. Although we know old man winter isn't done dumping the fresh powder, we are beginning to see signs of spring and new life here in beautiful Colorado. We also have been blessed with a new life (our boy, Micah William [born 2/17/05]), and if you're wondering what he looks like and you've seen Curtis you don't have to wonder much more.

As always, Enjoy,
Alanna & Curtis

WORLD

1. (World) Orbis Terrarum Tabula Recens Emendata et in Lucem Edita Per N. Visscher., Visscher, Amsterdam, c1663, 12.5 x 18.75, full hand color

A stunning hand colored Bible map of the world with a surrounding cartouche full of animals and dragons. The continents are mostly completed, but that by some theorizing. Four maidens representing the continents are in each corner. Condition is very good. $3600.00

2. (World) Mappe Monde, Buffier, Rouen, 1782, 5.5 x 7, hand color

Perhaps the most recent map that we've offered to still include California shown as an island. This small French world map shows the basics of the continents with some pretty antiquated takes on the southern continent, not to mention the isle of California and an amorphis North Pole that covers what should be Alaska. Condition is good with a supportive repair three small spots of foxing above the eastern hemisphere. $220.00

An aged beauty from the end of the Empire era. This large globe holds a wealth of character and gives an interesting glimpse of a world portioned by European powers. For instance in just northeast Africa we see "British", "French" and "Italian Somaliland", likewise in south Africa with the "British" and "German". In Europe itself the Austro-Hungarian empire still sprawls across the south, while Turkey still holds a portion of the Balkans. The US holds its own territories from Alaska to the Pacific and the Philippines. The continents are mostly completed, but that by some theorizing. Four maidens representing the continents are in each corner. Condition is very good. $3600.00

This handsome map parallels the "Dog Map of the World" which we have offered from the past, and is from the same publisher, and great quality. While the map mentions historical origins of horses in several nations, surrounding the image are vignettes for horses from China and Arabia to the US and Mexico to the many breeds of Europe. Condition is very good with some small repairs to the centerfold. $85.00

Out of the Pictorial Mapmakers of the 30's and 40's few stand out like Ernest Dudley Chase. His isn't a whimsical cartoon style, but something different. Done in a simple and colorful approach, his maps are packed with key information, sketch vignettes, and are almost a cultural time capsule. This world map is a fine example with dozens of detailed little views for important world sights (Gibraltar, Ulm Cathedral, Houses of Parliament), as well as notes for Linbergh's transatlantic flight and Howard Hughes flight around the world ("3 days, 19 hours, 8 min."). It's a map rich in facts and still very eye catching. Surrounded by a border of the flags of the nations. Condition is very good with original box that is fair. $90.00

6. (World)- Airline Globe, The Ohio Art Co., c1960, 6 inch metal globe and base

Remember Western Airlines, Trans-Texas Airlines, or Safarina? As the airline industry is in flux, it almost seems appropriate to offer this small globe bank that features a base which shows the names and logos of twenty two airlines from the time. While many are familiar airlines are present, Lufthansa, and United, there are others long since gone like National Airlines. The globe shows good detail for its size noting nations and key cities, along with some air travel routes. Condition is very good. $65.00

This map is a revolutionary product of World War II and the airplane, and is a rethinking of our world. No longer basing proximity on navigable seas, now the air is our vantage point, and it changes everything. This map shows dramatically how easily accessible locations are by air, and how no one is isolated, at least not in the terms that had applied for millennia prior. Condition is very good. $80.00

NORTH AMERICA & UNITED STATES

8. (North America - Western Hemisphere) L'Amerique suivant les dernieres observations de L'Academie Royale des Sciences, Buffier, Rouen, 1782, 7 x 5.5, hand color

Based off of the map by Macquart by the same title, this late bloomer is still showing California as an island prominently floating off the western coast of the continent, indeed it is labeled as "Californie l." Showing the entire western hemisphere, there are likewise other portions of the map that are behind the time, but it is an interesting holdover. Condition is good with some close margins extended. McLaughlin #73, state 3. $245.00

9. (United States) A Map of the United States of America Agreeable to the Peace of 1783, Guthrie, 1785, 14 x 15.5, outline hand color

With the colonial borders still in flux, and the lands west of the Appalachians still vast Indian lands, dotted with dozens of tribal names, this is a fascinating map. Prior to the creation of Vermont, New York and Pennsylvania both border Lake Ontario. New England has an extra territory of "Sagahadock" just above Maine taking up what are today its northern reaches. This map also includes clear and distinct depictions of the fictitious islands of Lake Superior. Condition is very good, with the typical light off setting and a bottom margin is very close. $420.00

A masterful engraving of the US during a fascinating time of transition. While recognizable towns and roads cover the east, west of the Mississippi River is a huge Missouri Territory up to the continental divide, and west of the divide is a large District of Colombia that reaches well into British Columbia. The dense detail of the Rockies assimilates the information of Lewis & Clark, including a small notation for "Tour de Pompey" - Pompey's pillar. Pompey's being Sacagawea's son. The Southwest is still Mexico with a heart shaped Texas dotted with towns. Several hypothetical rivers flow from the base of the Rockies to the Pacific. Shows the Santa Fe trail connecting to the Spanish towns of modern Mexico. Notes dozens of native tribes and their locations. Condition is very good with some light overall browning to the entire sheet. $485.00

11. (United States) *The United States of North America*, Blackie, c1856, 14 x 19.5, outline hand color.

William Gilpin was Colorado's one time governor and full time businessman. He had some distinct ideas on how America would be populated, and why, and to support his theories he did a series of maps. Interestingly, they are some of the first to incorporate economic potential for a region and think in terms regional resources and climates. With bold hand color distinguishing like regions, it also shows concentric circles which suppose where the continents population will be concentrated in the future - Topeka, Kansas. Condition is good with a close left margin. $185.00

This map from the set by William Gilpin is another cartographic argument for the superiority of the central region of the country. The brightly colored map features a band that runs from San Francisco to Boston which marks the regions of most consistent temperatures, the ideal region to settle. Condition is very good with a close left margin. $165.00

15. (United States) *The United States of America*, Miguel Covarrubias, 1943, 14 x 20, printed color.

Born to Mexico's elite, Miguel was a self taught prodigy for illustrating and started making maps at 14. Later with a government scholarship, he studied in New York and fell in with the cultural heavy hitters of the time like Langston Hughes and Hurston. He began illustrating for Fortune and The New Yorker, as well as doing stage design and murals, and out of this time came his love of ethnology and maps. This is his famous cartographic map of the US that almost has a Thomas Benton Hart feel, colorful and refined, with beautiful caricatures and vignettes for the nations different regional characteristics. Condition is very good. $95.00

**STATES & REGIONS**

A map of the progress of the survey in this state, as several considerable Indian reserves are being extinguished. East of the Coosa River were the Creek Indians, west were the Cherokees. On the western border of the state two portions of Choclaw and Chickasaw lands are acknowledged, now annexed. Only a handful of major towns are shown, but still an interesting historical glimpse. Some off setting, top and bottom margins close and cropped in some areas. $90.00

A large map of the bay of Mobile and its islands with a special focus for the US Commission of Fish and Fisheries which shows the navigability of the area, but specifically notes the location of the natural oyster beds, and those planted. The map, listing store locations, is held by two barefoot and handsome hippies. Verso are guides to hippy history, language, posters, and nightlife, as well as a definition of psychedelic. It's hard to believe this was once a tourist attraction, much like a zoo. $140.00

37. (Massachusetts-Boston) Boston Map Cane, In-A-Cane Display Co., Boston, c1940, 13 x 19, full printed color
Here’s an approach that’s unique. This isn’t something that we encounter commonly, as cane collectors fancy them as well, but this 34 inch walking cane contains a nice map of the city of Boston with small architectural vignettes for significant buildings and a key at the bottom for places modern and historical. The map itself is printed on a dense treated cloth, and has endured very well, with some only minimal soiling on its outer edge, which is missing its crimped-on metal edge. In modern Minnesota, it touches on the rivers and lakes far up river from Fort Snelling, unlike anything we've seen for the time, well before Nicollet's map. Notes fur trading posts, as well as forts and small towns. A scarce map that is shown once in the price guides, and hasn't crossed our path before.
